St Stanislaus College - National Grade 9 Results - 2010 – 2016 Comments

- **Social Studies** earns the bragging rights, having achieved a 100% passing rate for 4 years in a row (2013 – 2016).
- **English** gains the 2nd prize with a 100% passing rate for 3 years, and not falling below a rate of 94.4%
- **English** also earns the bragging rights for a performance distribution that is tilted towards excellence. The cells highlighted purple indicate that more students scored between 70 – 80% than between 50 – 69%.
- **Maths'** claim to fame is based on having 3 students breaking through the “Excellent glass ceiling” (scores above 90%) , with 2 occurring in 2016, along with a nicely balanced performance distribution.
- The 2016 performance of **Science** shows that it is very much in the race. One can only guess that the lab work imposes an unfair handicap for Science.
- **Conclusion:** There is much to celebrate and be proud of with these results. **GO SAINTS !!**
